Summary

Master's graduate with 4+ years of software development experience, passionate about modern web technologies and building scalable applications.

Work Experience

Agile Developer — SAP

Vancouver, BC — Sep 2025 – Present

- Led the migration of the test framework to Playwright, reducing execution time by 30% and eliminating test flakiness.
- Designed scheduled automated test runs in Jenkins, hosted reports on a VM, and integrated Microsoft Teams notifications for faster feedback and triage.
- Increased team productivity by 25% by automating repetitive developer workflows through an internal Chrome extension built with React and WXT.

Application Developer — Leadrat

Jun 2023 – Jul 2024

- Refactored frontend architecture to optimize performance, achieving a 40% reduction in load times and improving the UX across mobile and desktop devices.
- Developed a user-driven Data Module in collaboration with cross-functional teams to transform static status handling into a configurable feature, reducing development time by 90%.
- Conducted technical interviews and mentored 5 web developers to ensure code quality standards and team growth.

Software Engineer — TenderCuts

Apr 2022 – Jun 2023

- Architected a multi-store management feature, reducing store-switching latency by 95% for retail partners.
- Reduced annual operational costs by \$500 by migrating the map features from Google Maps to MapMyIndia.
- Standardized UI development by consolidating shared styles into a Git submodule, ensuring 100% design consistency across all internal applications.

Associate Consultant — Oracle

Sep 2020 – Apr 2022

- Developed and integrated features for ICE-T, a project estimation tool, using OJET and TypeScript.
- Engineered 10+ Java backend APIs and integrated with frontend components for robust data handling.
- Presented feature demos for product owners weekly to maintain alignment with stakeholder requirements while actively participating in Agile ceremonies and code reviews.

Projects

JavaScript Fn Docs — Node.js, VSCE, Gemini AI, Rest API, TypeScript, Jasmine, Karma

- Built a VS Code extension used to auto-generate documentation for 40+ functions, reducing manual effort by 70%.
- Integrated Gemini AI via REST APIs to produce structured function comments, reducing manual effort by 70%.
- Implemented automated unit tests with Jasmine and Karma, achieving 90%+ test coverage and ensuring reliability.

Take Me There — React Native, Node.js, Tailwind CSS, Firestore, MongoDB, Figma, Heroku

- Developed a cab-booking automation app to reduce multi-app ride search time.
- Implemented secure login and signup flows with Firebase Authentication, including form validation and error handling.
- Built backend APIs with Node.js and MongoDB Atlas to store and manage user data, and trip information.
- Designed and implemented drawer-based navigation with ride booking, profile, trip history, and logout functionality.

Education

Master of Applied Computer Science — Dalhousie University

Apr 2026

BE in Computer Science & Engineering — Sathyabama Institute of Science and Technology

Jun 2020

Skills

Languages: TypeScript, JavaScript, Java, Python, C#, HTML5, CSS3, SQL

Frameworks: React, React Native, Angular, Ionic, Redux, WXT, Bootstrap, Tailwind CSS, Node.js, Express

Technologies: Git, Playwright, Jenkins, CI/CD Pipelines, GitHub Actions, Docker, MongoDB, MySQL, Firestore, JIRA, Postman, Figma, Agile/Scrum, Unit Testing

Soft skills: Team collaboration, Self-starter, Problem-solving, Adaptability, Communication, Time management
